

### Tru-Lok® Measuring Tapes

Industrial quality tape measures with heavy-duty blades as standard...this is the basic measuring tape style used by professionals and homeowners throughout the world. They are named Tru-Lok® because the blade positively locks in position until the cam-activated lock button is released. A new, heavy-duty tape line is furnished standard (except where noted), making the tape ideal for work under demanding conditions.

Tru-Lok® tapes are available in five case colors that easily stand out in the toolbox, workbench or job site. Recycled case models (Re-Tape™) also available.

- Tough Tip® Blade Protector standard on all 1" and 3/4" (25 and 19 mm) blades (except Re-Tape™).
- Rugged, impact resistant case.

### Magnesium Case Tape Measure

This new measuring tape is the first tape to use a 100% magnesium case. This case is lightweight and incredibly strong.

- Heavy-duty
- Ergonomic, non-slip ribbed rubber grip is comfortable and easy to handle under any working condition.
- A cam-activated positive locking mechanism prevents the blade from slipping.
- Heavy duty UV coated blade is 3 times more wear resistant.
- Tough-tip stainless steel blade protector reduces blade breakage.
- Durable stainless steel belt clip.
- Improved reel design and rust-resistant return spring provides smoother action.
- New shock absorbing blade bumper cushions the impact of the blade when retracted ensuring a longer tip and blade life.
- The Mag is made 100% in the USA.

## Chalk Lines / Torpedo Levels

### Chalk Lines/Plumb Lines

- Chalk lines are available in a die-cast reel with a durable enamel finish or molded, high-impact ABS black plastic reel.
- Exclusive slide-action lock and hook ring provide true plumb bob action.
- Lock releases automatically on rewind.
- Handle closes flush with the case.
- Leak resistant tip opens for quick filling with chalk.
- Supplied without chalk.
- Top-quality replacement lines on “pop-in” spool.
- Replacement lines also fit most other chalk reels.

Part No. 63138, 63140

Length	Die Cast Models		ABS Plastic Models	
	Part No.	Model No.	Part No.	Model No.
50' (15 m)	63138	SCL50	63140	SCL15
100' (30 m)	63139	SCL100	63141	SCL110

### Replacement Lines Only

Part No.	Length	Model No.
63166	50' (15 m)	SRL50
63167	100' (30 m)	SRL100

### Chalk Refills

Highest quality, specially formulated, powdered chalk colored to mark distinctly. Lays down a hard, clean line that won't blow away.

- Available in easy-to-use plastic bottles with no-spill cap.
- For use in all chalk line reels.

Part No. 63146

### Refills

Part No.	Unit Wt.	Color	Model No.
63146	8 oz. (227 g)	Blue	SC8B
63147		Red	SC8R
63148		White	SC8W
63154	5 lbs. (2.27 Kg)	Blue	SC5B
63155		Red	SC5R
63156		White	SC5W

### Aluminum Torpedo Levels

Torpedo levels are handy tools that find their way into most tool boxes. They are relatively small, are light but sturdy, and come in a variety of styles. All of our torpedo levels have three vials; a top and side reading level, plumb, and 45° miter. Each vial is precision mounted, requiring no adjustment. All feature hang holes as well.

#### A-9 and M-9

- Cast aluminum frame with working surfaces that are lapped for accuracy.

**Part No. 36069-** A-9 has a V-grooved base for plumbing and tubular work.

**Part No. 36070-** M-9 has a strong magnet set in the base to hold the level securely to iron and steel surfaces.

Part No. 36069

#### AM-9

- Starrett's best torpedo level.
- Cast aluminum frame with working surfaces that are lapped for accuracy.
- Strong magnetic base holds the level securely to iron and steel surfaces.
- V-grooved top working surface is ideal for plumbing and tubular work.

**Part No. 36071**

Part No. 36071

**Portable Band Saw Blades / Utility Knives**

**Replacement Blades for Portable Band Saws**

Bi-Metal Unique™ breakthrough saw blade technology is applied to these blades. Tests have shown that Bi-Metal Unique technology produces faster cutting and longer blade life.

- HSS teeth contain 8% cobalt.
- Two strips of high speed steel wires are joined to a backing steel in a solid phase.

**Adjustable Utility Knives**

Adjustable and retractable knives have a rugged die-cast handle that is specially shaped for a comfortable grip. The design prevents the blade from pushing up through the handle when applying cut pressure. The spring-loaded thumb switch smoothly adjusts the blade to three cutting positions and retracts the blade for safe locking. Blade locks in four positions. Complete with three blades.

**Fixed Blade Utility Knife and Scrape**

Combination fixed blade utility knife and scraping tool, complete with two blades. Features rugged, die-cast handle with grey enamel finish. Blade notch in handle allows for scraping. Case design prevents blade from pushing up through handle.

**Retractable Mini-Knife**

A handy, pocket-sized adjustable utility knife with key chain. Adjusts to three positions. Complete with two blades. Chrome plated case.

**“Pressure Point” Utility Knife**

Recessed shape of the Pressure Point Knife accommodates the user's thumb, providing maximum leverage. Contoured handle design is more comfortable to use. The nose design prevents the blade from pushing up through the handle when pressure is applied. A spring-loaded thumb switch allows easy, smooth adjustment among four cutting positions and retracts the blade. Complete with three blades.

**Replacement Blades and Dispenser**

- Heavy-duty blade dispenser is safe and convenient; 100 blades in a rugged plastic case that can be wall mounted or stored in a tool box.
