

Welding Helmets

Complete Command without Removing Your Helmet

- Grinding- Simply press the oversized shade control button and the auto darkening filter is locked in to a shade 4. This eliminates filter flickering while grinding or brazing. Both are now possible without helmet removal. Depress control button again to reset ADF.
- Shade range selection- This sliding switch can be used to select shade ranges of 5-9 and 9-13. Choose your range and then adjust to the appropriate shade using the shade level control knob.
- Shade level control- Adjust this control knob to select the shade within settings of 5–9 or 9–13. Selections can be made according to the welding process making this one of the most versatile helmets on the market.
- · Sensitivity control- Factory set at red dot for most procedures. Adjustable to meet different welding applications including microplasma, plasma cutting, and low amperage TIG welding to name a few. Match the sensitivity level to your specific need.
- . Delay switch- By using the sliding switch, the time delay from dark to light can be adapted to your individual requirements.
- · Solar cells- Optrel Expert by Uvex's proven solar technology ensures a continuous power supply while also eliminating the need for on/off switches and untimely/costly battery changes.
- · Adjustable sensor bar- Eliminate the effects of ambient light. Simply slide the sensor bar up and the angle of detection will open from 60° to 120°, which optimizes performance during low current and over the head welding. Keep it down and reduce the chances of a nearby arc darkening your lens.
- Eye protection- Several LCD's and special filters provide permanent Shade 14 protection from dangerous UV and IR radiation, even in the bright state.

Part No. K604- Cosmic Copper

Part No. K602- Silver

Part No. K601- Blue

Part No. K603- Green

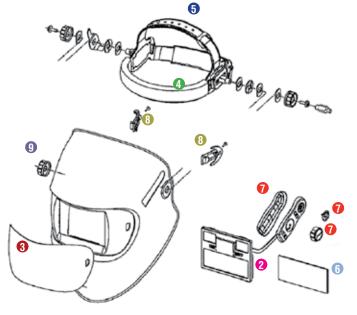

Satellite™ ADF Shade Cartridge 2" x 4-1/4"

• Two-year warranty on ADF filter.

Part No. K610

Parts Diagram- Optrel® Satellite™

Code	Part No.	Description	Quantity
2	K596	Satellite shade cartridge	1 each
3 (A)	K5910	Satellite front cover lens	Set of 2
3 (B)	K5911	Satellite front cover lens	Set of 5
4	K5822	Sweatband	Set of 2
5	K5821	Headgear	1 each
6	K5812	Inside cover lens	Set of 5
7	K5920	Potentiometer knob, back cover, & sensitivity knob	1 Set
8	K5921	Cover lens connection clips	Set of 2
9	K5820	Potentiometer knob only	Set of 10

Welding Helmets

Orion[™]

Auto-Darkening Welding Helmet (Automatic or Manual)

- Variable shades: 9-13 (automatic or manual).
- Solar powered.
- · All adjustment controls on outside of helmet.
- · Dark-to-light delay switch select fast or slow.
- Telescoping headgear design with patented eccentric knob.
- · Two-year warranty on ADF filter.
- · Long-life, easy-to-change cover plate design with integrated seal.
- · Shade level automatically adjusts as arc light intensity changes.
- Automatic and manual shade settings.

Part No. K570 - Black Part No. K575 - Magic Blue

Orion™ Cartridge 2" x 4-1/4"

Part No. K597

Part No. K570

Part No. K575

MiraPlus™

Auto-Darkening Welding Helmet

- · Selectable shades: 10 and 11.
- Solar powered.
- · Telescoping headgear design with patented eccentric knob.
- Two-vear warranty on ADF filter.
- Long-life, easy-to-change cover plate design with integrated seal.
- · Shade 10 and 11 selectable via non-contact toggle switch.

MiraPlus™ ADF Shade Cartridge 2" x 4-1/4"

· Two-year warranty on ADF filter.

Part No. K593

Part No. K532- OSE Blue

Part No. K533- Black, unpainted, selectable shade 10 or 11

K700

The Optrel® Galaxy stationary 2" x 4-1/4" model meets the demands of the everyday welder by providing comfort and style.

- 2" x 4-1/4" viewing area.
- Install an Optrel® NOVA™ ADF cartridge for the ultimate experience in auto darkening technology (sold separately).
- Shade 10 passive filter and cover lens included.

Part No. K700- stationary filter lens

NOVA™ Shade Cartridge 2" x 4-1/4"

Automatic shade adjustment cartridge 2" x 4-1/4".

- Shade cartridge Auto-darkening welding filter with automatic shade adjustment 3/10 or by use of an additional colored filter. (+1 shade) 4/11.
- · Viewing area Darkens automatically within a fraction of a millisecond.
- · Solar cells The use of solar energy means that an on/off switch and change of battery are no longer needed.

Part No. K590

Magnification Lenses

Eliminate the need to wear eyeglasses under your Optrel® welding helmet with any of these magnification lenses. Simply remove the existing inside cover plate and insert the plate of your choice (a universal fit with all Optrel® helmets).

 Part No. K5816- 1.0 diopter
 Part No. K5818- 2.0 diopter

 Part No. K5817- 1.5 diopter
 Part No. K5819- 2.5 diopter

Hard Hat Adapter

• For easy attatcment of any Optrel welding helmet to a hardhat.

Part No. K5930
